Therapeutic massage is a technique that targets the deep layers of muscle tissue. It aims to release the chronic patterns of tension in the body through slow strokes and pressure focused on fibers of the muscles, tendons and fascia. When delivered on a regular basis, massage is a natural alternative that helps the body in the healing process. Therapy work relaxes, stimulates, tones, expels toxins and restores natural energy.

SPECIALTY TREATMENTS

Advanced skin treatments target problem skin issues and render quicker, more profound results without costly medical treatments or downtime. Specialty Treatments can be performed as a single treatment or combined with any Facial or Back Treatment, and may be suggested by your esthetician.

HAIR REMOVAL

Destiny's preferred method of hair removal is sugaring, which offers a safe, gentle and effective solution to hair extraction that can lead to permanency. The most important advantage of sugaring is that the paste extracts hair in its natural direction of growth, and does so when the hair is still in the early growth stage. This eliminates breakage, unnecessary discomfort, irritation and ingrown hairs, while exfoliating dry skin cells at the same time. The result is smooth, beautiful skin, without the discomforts of other epilation techniques.

CHEMICAL PEELS

Traditional Acid Peels utilize a mild to moderately strong chemical solution, while Enzyme Organic Peels use fruit enzymes to penetrate the skin. Both cause peeling over a 7-14 day time period and provide similar results, as well as a complete anti-aging solution-tightening and smoothing the skin, and correcting blotchiness and hyper-pigmentation.
